

Extend Your Network Connection Through Your Power Points

"Reach areas of the House that no other Wireless Systems can."

No tearing into walls to install cable! - No software required!
Works with all operating systems and Ethernet enabled devices!
Share your existing Internet connection throughout your house.
It's as easy as 1-2-3

1. Plug your existing DSL, cable or other broadband modem into the first NeverWire 14.
2. Plug the NeverWire 14 into any power outlet.
3. Plug your second NeverWire 14 into any other power outlet in your home-and plug in your computer!

Just reliable broadband internet access from any room in your home or small office, from the world leader in powerline technology. You can even move your NeverWire 14 from room to room-wherever you need internet access or network sharing. Think of all the places you can enjoy your speedy broadband internet connection or your private network courtesy of the NeverWire 14. Emailing from your deck. Sharing printers or even network gaming.

Concerned about security? NeverWire 14's exclusive one-touch security button makes it easy to protect your privacy-no passwords to remember, no software required. It's all in the exclusive dual processor design. The diagnostic LED light lets you know that security is working and your privacy protected.

You can also use the NeverWire 14 to network any ethernet-enabled device-computers, printers, routers, DSL modems, cable modems and popular gaming devices.

NeverWire 14 comes with a no-questions-asked money-back guarantee, if you are not satisfied with the NeverWire 14 for any reason, we will refund your money within 30 days. No hassles!
